Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

Academic Program and Course Description Guide

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description:</u> Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission:</u> Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies</u>: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

1. Program Vision

The department seeks to provide a theoretical and practical financial and banking educational program that is distinguished by its high quality in accordance with academic, research and technical standards by following up on future indicators for the development of financial and banking sciences and the necessary methods for understanding and keeping pace with this development in automation to contribute to building a sustainable banking future and excellence in the three pillars of science (teaching, scientific research and community service).

2. Program Mission

The department's mission is to create and disseminate knowledge and develop skills and capabilities related to the financial, banking and investment sectors to meet the requirements of the local and global markets and to provide advisory and training services to serve the community.

3. Program Objectives

- 1. Preparing qualified technical personnel to work in the financial and banking sectors and related activities.
- 2. Enhancing students' analytical understanding of the modern concept of financial and banking sciences, in a sustainable financial and banking world.
- 3. Providing students with the skills, knowledge, and competencies required to build a prosperous professional future.
- 4– Qualifying graduating students according to the requirements of the labor market and enabling them to find a good job in the banking sector or any financial institution, whether local, regional, or international.
- 5- Preparing students to participate positively and effectively in developing and improving the country's economy.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

- One of the new departments for the academic year 2024-2025.

5. Other external influences

Is there a sponsor for the program?

-Ministry of Higher Education and Scientific Research - Scientific Supervision and Evaluation Authority

9. Teaching and Learning Strategies

- 1- The availability of scientific curricula and systematic plans for their efficient implementation:
- Brainstorming strategy to develop thinking and creativity.
- Delivering theoretical lectures, providing theoretical examples and case studies,
 and utilizing modern digital tools such as digital screens.

- Student group strategy for providing exercises and practical examples.
- Report and study strategy that develops students' research and writing skills.
- 2- Using academic resources and constantly updating them to ensure students' sound understanding.
- 3- Field visits to financial and banking institutions, attending lectures, and discussing ideas.
- 4- Using visual aids and digital projectors for topics that require them.

10. Evaluation methods

- Quarterly and annual written exams
- Quick quizzes
- Homework assignments
- Evaluation of participation, contributions, and classroom discussions
- Periodic reports, their discussions, and the results of research and its scientific outcomes.

Professional Development

Mentoring new faculty members

- Introducing new faculty members to the university's vision, mission, organizational structure, policies and procedures.
- Enabling new faculty members to gain a better understanding of their rights and obligations.
- Providing new faculty members with detailed information about the university's facilities and services..

Professional development of faculty members

- 1. The department's academic committee develops the curriculum outline, discusses it with faculty members, and explains their teaching path.
- 2. Encourages the publication of publications that include the curriculum agreed upon by the ministerial committee.
- 3- Writing periodic research papers within the specific specialization and discussing them within the department's plan.
- 4- Instructing instructors to use modern teaching methods.
- 5- Participating in seminars, workshops, and conferences that develop faculty.
- 6- Sending faculty members on scholarships to international universities to benefit from their

experiences.

12. Acceptance Criterion

The learner must have a preparatory school certificate (scientific, literary, or commercial)

13. The most important sources of information about the program

- The Central Library at the Karbala Technical Institute
- The Iraqi Digital Repository for University Theses and Dissertations
- The Middle Euphrates Technical University Digital Repository (ATUDR)
- The scientific researcher's website on the search engine (Scopus/Google scholar/ResearchGet)
- The Iraqi Virtual Scientific Library (IVSL)
- The electronic library of the Karbala Technical Institute.

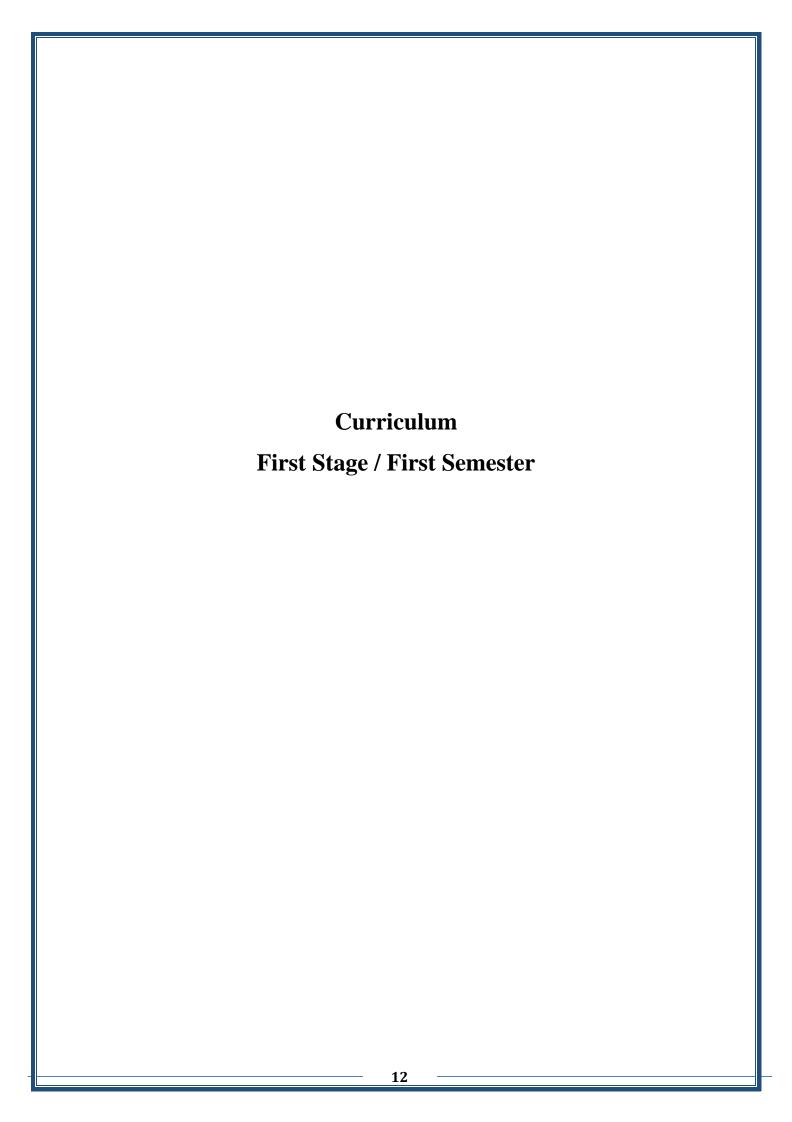

14. Program Development Plan

- Developing the curriculum according to the annual plan to update the institute's approved curricula.
- Periodic review of the curriculum.
- Monitoring scientific conferences and the latest developments in the curriculum.
- Aligning with what is offered by similar educational institutions.
- Studying the needs of the labor market.

Principles of financial accounting

1. Course Name:

Principles of financial accounting

- 2. Course Code:
- 3. Semester / Year:

2024-2025

4. Description Preparation Date:

30/10/2024

5. Available Attendance Forms:

My presence

6. Number of Credit Hours (Total) / Number of Units (Total)

15 hours of gardening, 1 hour per week / number of units 6

7. Course administrator's name (mention all, if more than one name)

Safa yassen shaker

- 8. Course Objectives
- -Providing the student with basic information about accounting principles.

Objectives of the study subject

- Enabling the student to deal with various accounting records.
- Extract results for a limited period of time.
- Dealing with software for accounting work

9. Teaching and Learning Strategies

Strategy

- Managing the lecture according to the descriptive approach to vocabulary presented by Ministry
- Managing the lecture according to the applied approach
- Assigning students to daily assignments and tests
- Using modern methods of learning such as (Al-Sarraj System)
- Power point presentation or video lecture on Zoom.

Week	Hours	Required	Unit or subject name	Learning	Evaluation

Human rights and democracy

1. Course Name:

Human rights and democracy

2. Course Code:

3. Semester / Year:

First Semester/2024-2025

4. Description Preparation Date:

October 30, 2024

5. Available Attendance Forms:

In-person

- 6. Number of Credit Hours (Total) / Number of Units (Total)
 - (30) Theoretical / (2) hours per week Number of units (2)
- 7. Course administrator's name (mention all, if more than one name)

Assistant Professor Azhar Awini Abdul-Ridha Al-Hamdani <u>azhar.reda@stu.edu.iq</u>

8. Course Objectives

Course Objectives

- The student will learn about the principles of human rights, democracy, and public freedoms.
- The student will learn about the articles of the Universal Declaration of Human Rights issued by the United Nations in 1948.
- The student will learn about Iraqi constitutions and the human rights they include for t Iraqi people.
- The student will learn about constitutional, judicial, and political guarantees.
- The student will learn about the nature of democracy and its types, as well as the nature, types, and controls of public freedoms.
- The student will learn about democratic practices, including elections and nominatio and the rights and duties associated with them.

9. Teaching and Learning Strategies

Strategy

- A descriptive lecture based on the thematic vocabulary presented and approved by the Ministry.
- The lecture is conducted in a practical manner, connected to daily life, t engage the student in the subject matter, without straying from the core topic, ensuring the material is flexible and amenable to understanding an analysis.
- A percentage of the grade is allocated to daily assignments and tests.
- Assigning students to certain group activities and assignments.

- Using modern learning methods, including distance learning (the Siraj system).
- Using websites, especially those of United Nations human rights organizations, to benefit from reports on international and regional humanights.
- A PowerPoint presentation; a video lecture (Zoom/meeting)

 - 7. Course administrator's name (mention all, if more than one name)

Athmar Hamza Turki

8. Course Objectives

After completing the lecture, the student should be able to:

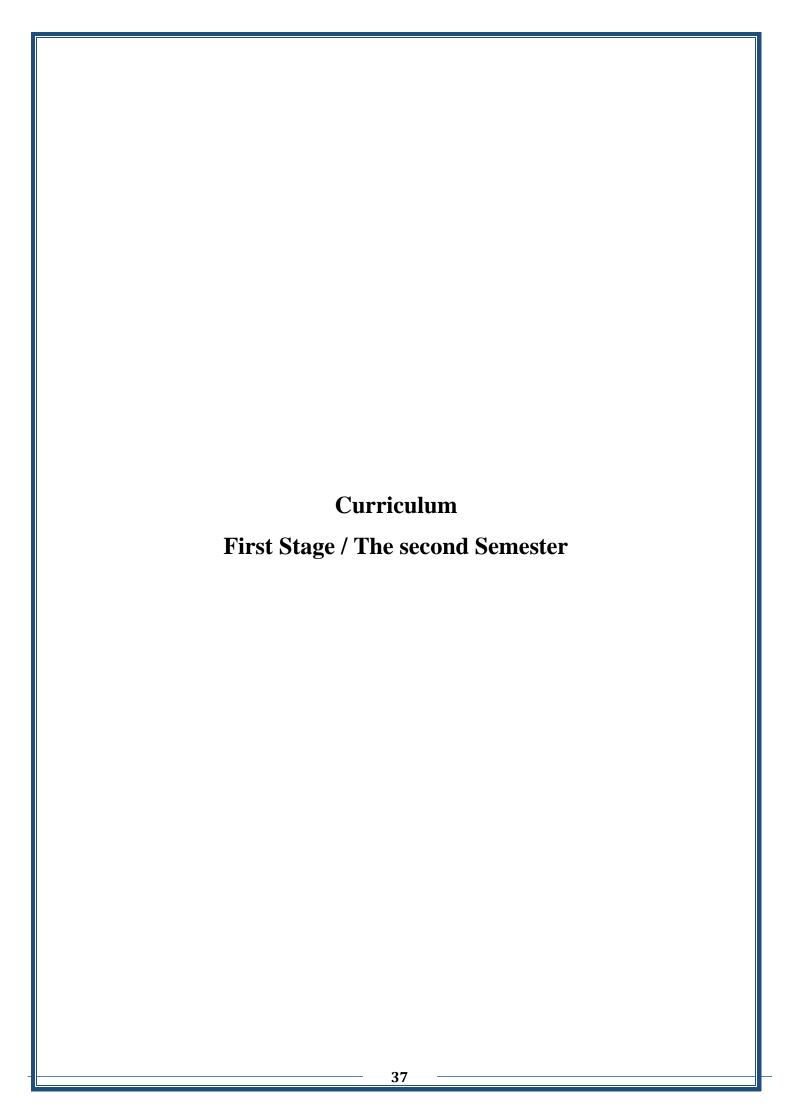

- Distinguish between the closed taa and the open taa.
- Mention some words ending with a closed taa and others ending with an open taa.
- Distinguish between the extended alif and the short alif.
- Distinguish between the lunar and solar lam.
- Distinguish between the letters Dad and Dad.
- Recognize the hamzat al-qata' and hamzat al-wasl.
- Identify the positions of the hamzat al-qata' in nouns, verbs, and letters.
- Identify the positions of the hamzat al-wasl in nouns, verbs, and letters.
- Define the medial and final hamza.
- Explain why the medial hamza is written on alif, waw, and ya'.
- Use punctuation.
- Identify word division.
- Identify noun markers.
- Distinguish between nouns, verbs, and particles.
- Extract objects from sentences.
- Know the types of numbers.
- Determine the rules for matching numbers and counted objects according to their type.
- Understand the language of administrative discourse.
- Know the meanings of prepositions.
- Mention the positions of the distinguishing alif.
 - 9. Teaching and Learning Strategies

Strategy

- Lecture delivery method.
- Discussion method.
- Error detection method.
- Assigning students to prepare brief reports.
- Allocating a percentage of the grade for daily assignments and tests.
- Using modern learning methods, including distance learning (the Siraj system).
- Using software technologies such as PowerPoint.

Principles of statistics

1. Course Name:

Principles of statistics

2. Course Code:

3. Semester / Year:

First year, second semester

4. Description Preparation Date:

25/2/2025

5. Available Attendance Forms:

Actual presence

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours, 4 hours per week, 2 hours practical and 2 hours theoretical

7. Course administrator's name (mention all, if more than one name)

Asaad Rahem Muhsen

8. Course Objectives

Course Objectives

- Introducing the student to the importance of statistical applications and benefiting from them in the fields of accounting and financial work.
- Developing knowledge of how to use statistical measures in research and accounting work
- The student acquires the scientific skills to work on these standards in several fields, such as statistical analysis.
- Promoting creative thinking by consolidating the importance of statistics in all areas of professional and practical life.

9. Teaching and Learning Strategies

Strategy

- Lecture strategy
- Student group strategy
- Strategy reports and studies
- Strategy for using illustrations and digital display devices for topics that require it.
- Enables the student to access the required statistical information, as well as learn about the characteristics of the sample taken from the community, and also gives the ability to make a statistical distribution of the data in the sample, which helps in forming a hypothesis based on statistical estimation and statistical hypotheses.

	rs	Learning		method	method
		Outcomes			
First	3	Cognitive outcomes	Statistics - Definition - Relationship with other sciences - Scientific method of research - Data collection, data classification - Data presentation - Data analysis	A theoretical lecture with some examples	Ask questions
second	3	Cognitive outcomes	Data sources - Methods of obtaining data - Comprehensive registration - Samples - Questionnaires - Their conditions - Conducting them	A theoretical lecture with some practical examples	Oral and written questions
Third	3	Cognitive outcomes	Data Distribution Display - Tabular Data Display - Frequency Distribution - Double Frequency Distribution	A theoretical lecture with some practical examples	Listen and ask questions
Fourth and Fifth and sixth	3	Cognitive outcomes	Graphical display of ungrouped data -Line graph -Bar graph -Circle graph -Rectangle graph Graphal display of grouped data -Histogram -Curve graph -Polygon graph -Ascending and descending cumulative graph	A theoretical lecture with some practical examples	Listen and ask questions
Seventh and Eighth and ninth	3	Cognitive and skills outcomes	Measures of central tendency: arithmetic mean - mode - median - relationship between averages	A theoretical lecture with some practical examples	Case studies and teaching tests
Ten and eleven and twelfth	3	Cognitive and skills outcomes	Measures of dispersion: range - standard deviation and variance - coefficient of variation - standard score	A theoretical lecture with some practical examples	Case studies and written tests
Thirteenth and Fourteenth and fifteenth		Cognitive and skills outcomes	Simple linear correlation: its concept - method of calculating it for ungrouped data - correlation coefficient for grouped data, rank correlation, Spearman's rank correlation, modified Spearman's correlation	A theoretical lecture with some practical examples	Cognitive and sk outcomes

Financial and banking legislation

1. Course Name:

Financial and banking legislation

- 2. Course Code:
- 3. Semester / Year:

2025-2024 / the first

4. Description Preparation Date:

2024/10/30

5. Available Attendance Forms:

In presence

6. Number of Credit Hours (Total) / Number of Units (Total)

(30) 1n+2p/(3) hour

7. Course administrator's name (mention all, if more than one name)

Aizhar Aowini Abdul Reda

azhr.reda@atu.edu.ig

8. Course Objectives

Course Objectives

- 1- Providing the student with information and general provisions of financial and banking legislation
- 2- A statement of the legal rules that create the student's legal background to enable him to d with this legislation
- 9. Teaching and Learning Strategies

Strategy

- 1- The descriptive lecture according to the topical vocabulary presented and approved the Ministry
- 2- Modern methods of learning, including distance learning.
- 3- Use some websites, especially the Iraqi Legislation Base websites and the website The official report of the Central Bank of Iraq and some banks to benefit from special reports

its activities and protection..

- **4- Power point**
- 5- Managing the lecture in an applied manner related to the reality of daily life to attr the student to the topic of the lesson without moving away from the core of the topic that the material is flexible and capable of understanding and analysis
- 6- Allocate a percentage of the grade for daily assignments and tests
- 7- Assigning the student some group activities and duties

Week	Hours	Required	Unit or subject name	Learnin	Evaluation
		Learning Outcomes		g method	method
1	1n+2p	Develop cognitive comprehension	Introduction to the nature of legislation, regulations and instructions - legislation regulating banking business - their sources - characteristics of the rules regulating banking business	Lecture theory	General questions and discussion

Computer Course

1. Course Name:

Computer Course

2. Course Code:

3. Semester / Year:

First year – Second Semester

4. Description Preparation Date:

26/2/2025

5. Available Attendance Forms:

Actual presence

6. Number of Credit Hours (Total) / Number of Units (Total)

45 ours, 3 hours per week, 2 hours practical and One hour theoretical

7. Course administrator's name (mention all, if more than one name)

Dr. Hassan Mohammed Jwad

Prog.Noor Abd Al-Rudha Jawdet

8. Course Objectives

Course Objectives

- Students can be able to Utilize the computer for fundamental tasks.
- Identify and discuss the hardware components of the computer system.
- Creating documents using a word processor and creating presentations.
- Conducting research on the Internet.
- An introduction to Artificial Intelligence (AI).

Teaching and Learning Strategies

Strategy

- Lecture strategy
- Student group strategy
- Strategy reports and studies
- Strategy for using illustrations and digital display devices for topics that require it.
- Enables the student to access the required statistical information, as well as learn about the characteristics of the sample taken from the community, and also gives the ability to make a statistical distribution of the data in the sample, which helps in forming a hypothesis based on statistical estimation and statistical hypotheses.
